Descriptive research is used to describe characteristics of a population or phenomenon being studied. It does not answer questions about how/when/why the characteristics occurred. Rather it addresses the "what" question (what are the characteristics of the population or situation being studied?) Study.com has been an NCCRS member since October 2016. The mission of Study.com is to make education accessible to everyone, everywhere. Students can save on their education by taking the Study.com online, self-paced courses and earn widely transferable college credit recommendations for a fraction of the cost of a traditional course. In this lesson, we look at the difference between basic and applied psychological research and discover why there is a separation. Through examples, we'll answer the questions, 'What is the ... Descriptive Research. Once the groundwork is established, the newly explored field needs more information. The next step is descriptive research, defined as attempts to explore and explain while ...
