## Understanding Your Child

Some helpful suggestions. Your child needs you to keep calm. Stop and look at what they are doing and give them your own attention, Try to catch their attention and, if possible, talk quietly about what is going on. Your 2-year-old now "One, two, three!" An ability to count begins as your child heads toward 3, at least in a primitive way. First a child is able to identify when there is one, and more than one (though not whether it's two or six). Understanding the key developmental milestones of this age will help you ensure your child is on track. It can also help you see what skills your child may need to learn and identify any warning signs that you and their pediatrician should discuss. Gross motor skills: Most 3-year-olds are able to walk a line, balance on a low balance beam, skip or gallop, and walk backward. They can usually pedal a tricycle, catch a large ball, and jump with two feet. Fine motor skills: By age 3, kids can usually wash and dry their hands, dress themselves with a little assistance, and turn pages in a book.. Most preschoolers can hold a writing instrument ...
